Good Afternoon Fred,

This is to address the 10" Stainless steel exterior chimney that was installed at 46-48 Washington Street in The borough of Red Bank. On 11/29/18 AJ Perri installed a 10" stainless Steel Chimney in the aforementioned property due to the deterioration of the existing brick and mortar chimney. The homeowner is looking to replace 2 water heaters on the property, and when we came in to inspect the systems we noted problems with his existing chimney. We did not submit a chimney application simply because we were going to submit it with the Water Heater App at the time we install the 2 water heaters. The Chimney was replaced to ensure the safety of the tenants living at the home.

I have our office preparing the chimney permit as I send this message and will follow with the water heater Permit when the job is schedule to be completed.

Thank you for your time and consideration Mr. Corcione
