

YARN STUDIO

Hi Maria,

Thanks so much for all your help today. I've attached the survey as well as all the art provided for the sign (approximate image on building supplied as well). The sizing is as follows:

Building front dimensions: 16' x 24', which equals 384 square feet

Sign dimensions: approx 2' x 16', equals 32 square feet, or less than 10%

Fonts: Helvetica, Franklin and a script (waiting to get the exact font from our designer, but it's our logo and really cannot be changed)

Sign materials: acrylic (same as current sign)

The vector image of the art should show the HPC what it will look like more clearly; the building owner has also requested that we follow the same aesthetic as the current signage. Let me know if I missed anything.

Have a great day/weekend -  
Laurie
