Maria,

For clarity: Typically, I am asked to review advance signage as part of this subcommittee. This is more of a zoning variance being sought, which is outside my charge. Can you clarify what feedback you are seeking from me? I appreciate your time.

Hi Maria, first things first HAPPY NEW YEAR to you and your family! Without a site plan or landscaping plan it is impossible to comment o this project. I'm sure Boris will give you the required street tree plantings. Take care,

Billy

Maria,

To formulate my thoughts:

I have no objections at this time to the facade and signage details that fall into my purview at this time. This is in no way a comment on any sought variances.

The side and rear set backs are very narrow and if this comes to planning will need to be looked at very carefully. It is a split level residential on one side and elderly housing on the other. I reserve all judgement until a final plan is submitted for a formal hearing but I am concerned about those details as presented here.

Thank you for your follow up.

Best,

I think this building and the number of units much to large for an already congested location
Not sure the traffic sightline is within limits
No first level green space
Handicap parking insufficient
Parking in general insufficient. With the theater there parking will be a nightmare

Maria,

Generally a proper site plan is required to make comments on; these are preliminary comments pending a review of the site plan and engineering estimates.

Water and Sewer: The current off-site infrastructure may or may not be able to handle the proposed flow, off-site improvements may be required. Existing water and sewer lines are not adequate for proposal. Water and sewer upgrades may require restoration of roadway from centerline to curb on Monmouth Street. A five year construction moratorium will exist on Pearl Street from completion of project.

Stormwater Management: Current infrastructure may not be adequate to handle proposed flow. Off-site improvement may be necessary. Any stormwater upgrades that disturb the existing roadway may require a centerline to curb repavement of the road. A five year construction moratorium will exist on Pearl Street from completion of project.

Parking:

Parking spaces appear undersized.

Most two way isles do not meet the minimum requirement for drive isles.

The access drive appears inadequate.

The access drive does not appear to meet the required curbed return requirements.

A restriction should exist on retail deliveries so delivery trucks do not double park during peak times on Monmouth and/or Pearl Street.

The appropriate number of handicapped spaces has not been met.

Handicapped spaces appear to be undersized.

Parking Ratios for residential units to parking spaces is inadequate.

Proposed plan does not include required electric vehicle supply equipment.

Thanks,

Cliff Keen

120 Monmouth Street- RiverCenter Visual Improvement Committee (VIC) review

The committee had a lengthy review over two separate meetings. We thank the project's architect, Mike Simpson, for presenting it and meeting with us.

While the committee liked and found appropriate the facade of the building's residential component, its gabled style roofs, building materials, and the green roof and internal courtyard, it finds the parking garage at grade level to be an awkward and difficult transition and treatment to the street scape. Suggestions for even a minimal ground floor retail or service and/or food use fronting on Monmouth Street were made to the designer.

It is hoped that this developer can help the street scape corridor with a more vibrant activity that would enhance the building for the many visitors and residents that will experience it as they connect to great Red Bank venues, the train station and downtown and west side sections of town.

With the hope of a cooperative enhancement by the developer to the project's street level component based upon the above VIC comments, the project is therefore conditionally approved.

EC Comments – 120 Monmouth St Plan

Needs further information and details.

No information on plantings, parking lot cover, water management, etc.

EC recommends using the Green Development Checklist and modify the plan accordingly

<https://www.redbanknj.org/DocumentCenter/View/8318/Green-Development-Checklist-PDF>
