The Borough of Red Bank Historic Preservation Commission:

Liam Collins, Chairperson
Marjorie Cavalier, Vice Chairperson
Louis Almerini
Paul Cagno
Karen Schmelzkopf
Doung Miller
Andy North
Bethzy Varela

Council Liaison: Kristina Bonatakis

This report has been prepared in accordance with the **Borough of Red Bank Chapter 490: Planning and Development Regulations Section 490-55(E) Procedures for Designation:**

The formal historic district nomination shall include:

1. A building by building inventory of all properties within the district
2. Color and/or black and white photographs of all properties within the district
3. A property map of the district showing boundaries
4. A physical description
5. Statement of significance which address the criteria for designation

The proposed historic district meets or exceeds certain criteria per **Section 490-55(D) Criteria for Designation:**

1. Character, interest, or value as part of the development, heritage or cultural characteristics of the Borough, State, or nation; or
2. Association with events that have made a significant contribution to the broad patterns of our history; or
3. Association with the lives of persons significant in our past; or
4. Embodiment of the distinctive characteristics of a type, period or method of construction, architecture, or engineering; or
5. Identification with the work of a builder, designer, artist, or architect whose work has influenced the development of the Borough, State, or nation; or
6. Embodiment of elements of design, detail, material, or craftsmanship that render an improvement architecturally significant or structurally innovative; or
7. Unique location or singular physical characteristics that make a district or site an established or familiar visual feature; or
8. Historic resources that yield, or may be likely to yield, information important in prehistory or history.

Executive Summary

The New Jersey Municipal Land Use Law enables the Borough of Red Bank to establish and empower a Historic Preservation Commission to protect historic districts and sites and enforce the regulations established within the Borough.

The Red Bank Historic Preservation Commission's purpose is to implement the Historic Preservation Element of the 2023 Master Plan, to provide guidance to property owners in achieving the preservation of historic resources, and to advance the following public purposes:

- To preserve and protect historic resources; and
- To maintain and develop an appropriate and harmonious setting for the historically and architecturally significant historic resources in the Borough.

The Borough's 2023 Master Plan finds that the Borough has a wealth of historic buildings, landmarks, and culturally significant places, and to preserve the character of a changing community, steps should be taken to prevent inappropriate renovations that detract from the historic value of structures within residential districts. The Master Plan explains that to maintain resources, the Borough should "inventory historic sites and implement appropriate zoning controls and design guidelines to help promote preservation of the historic resource." One of the recommendations regarding historic preservation is to explore the potential designation of additional sites and the expansion and creation of historic districts." This designation report is to undertake the recommendation of the Master Plan.

What is a designated local historic district?

An historic district is one or more historic buildings, properties, or sites and intervening or surrounding property that are recognized as historically or architecturally significant including these intervening or surrounding properties affecting or affected by the quality and character of the historic building properties or sites. Buildings, structures, objects and sites within a local historic district are evaluated to determine whether they are contributing and non-contributing structures within the district. Districts vary in size: some have hundreds of structures, while others have just a few. The district provides communities with the means to make sure that growth, development, and change take place in ways that respect the important architectural, historical, and environmental characteristics within a district.

This report contains information on the history of the proposed Irving Place Historic District, its architectural significance and descriptions of the buildings located therein.

Proposed Boundary Description

The district consists of the properties with frontage on Irving Place begin west from Maple Avenue extending east to Broad Street.

History of Proposed District

Irving Street was formed when Red Bank seceded from Shrewsbury Township in 1870. It is a short street situated between Maple Avenue and Broad Street. When the street was first formed, less than five homes fronted along the street. Around 1873, much of the land on Irving Place was owned by Senator Anthony Reckless' estate, which contained his residence fronting Broad Street- now the Women's Club. The Reckless estate comprised the area from Broad Street to Maple Avenue. The land was later subdivided to create smaller lots. After the street was fully developed, it was once lined with lush, mature trees. Irving Street was changed to Irving Place around 1898. Around 1908, the Trinity Church rectory was located at 205-207 Maple Avenue, which consisted of two buildings on the lot. The street was once advertised as having the most valuable properties within the Borough. Between 1915 and 1957, 43 Irving Place was razed to create Arthurs Place, which bisected the southern lots of

Irving Place to connect Irving and Bergen. Arthurs Place was named in honor of Irving W. Smock's grandfather, who lived at 39 Irving Place, Arthur Wilson.

Notable Events for Irving Place

1. **1898:** Irving Street received electric lights and gas lamps, making it the best street in Red Bank. *Ref: Red Bank Register, January 5, 1898*
2. **1898:** Albert S. Miller married and built a house on Irving Street. *Ref: Red Bank Register, January 26, 1898*
3. **1898:** Free mail delivery began in Red Bank, Irving Place, one of the first streets for free delivery. *Ref: Red Bank Register, July 6, 1898*

Statement of Significance

The Borough of Red Bank expanded its residential and commercial areas in the 1880s, where the Borough began to create a solid residential characteristic. The development along Irving Place reflects the Borough's residential beginnings. Irving Place's significance is marked by the period between 1870 and 1930. Houses on Irving Place are Colonial (Dutch and Revival), Queen Anne, Shingle, Stick, Craftsman, and American Foursquare, covering a range of American architecture.

The scale of the buildings constructed on Irving Place has been maintained and should be considered for preservation for any proposed improvements or new development efforts. Although some alterations took place over the years, the changes still reflect the architectural character found along the street.

It is to the credit to the owners of the homes along Irving Place for restoring and maintaining the architectural features of the structures despite the financial constraints that impact property owners throughout State of New Jersey.

Architectural Styles within the Proposed District

Dutch Colonial (1625-1840): Early 18th-century Dutch and Huguenot settlements in the Hudson River Valley area inspired Dutch Colonial Revival architecture. The style shares similarities with the Georgian Revival popular in the same period, with symmetrical bays of windows and a centered front door. Dutch Colonial homes fell out of popularity for about a century in the mid-1800s, but the style experienced a widespread revival in the early 1900s. Dutch Colonial Revival first reappeared after the American Centennial in 1876. The gambrel roof's full second story of space made the Dutch Colonial Revival house a practical choice for families. It is still a standard style found in interwar suburbs.

Identifying features: Pitched roofs with gables facing the street, verandas or covered porches, Dutch doors divided horizontally, timber shutters covering windows, and raised foundations in flood-prone areas.

Colonial (1600-1700): Colonial-style houses were first built under colonial rule in the United States in the 1600s and 1700s. Colonial architecture remains one of the most famous architectural home styles throughout the United States. The Colonial Revival style developed in the late 18th century and grew in popularity during the 20th century.

Identifying features: Symmetrical facade, gable roof, and rectangular shape; two to three stories; brick or wood siding with simple and classical detailing; and elaborate entrances, pillars, columns, dormers, and decorative shutters.

Queen Anne (1880-1910): The Queen Anne style was trendy in American architecture at the turn of the 20th century. Queen Anne houses are most conveniently subdivided into two sets of overlapping subtypes. The first is based on characteristics variations in shape; the second is on distinctive patterns of decorative detailing.

Identifying features: Steeply pitched roof of irregular shape, usually with a dominant front-facing gable; patterned shingles, cutaway bay windows, and other devices used to avoid a smooth-walled appearance; asymmetrical facade with a partial or full-width porch, which is usually one story high and extended along one or both side walls.

Shingle (1880-1910): Most Shingle houses were built between 1880 and 1900, with relatively few examples from the late 1870s and early 20th century. The style began and reached its highest expression in the seaside resorts of the northeastern states. The Shingle style was a uniquely American adaption of other traditions.

Identifying features: Wall cladding and roofing of continuous wood shingles (shingled walls may occur on the second story only; original wooden roofing now replaced by composition of shingles on most examples); shingles walls without interruption at corners (no corner boards); asymmetrical facade with irregular; steeply pitched roof line; roofs usually have intersecting cross gables and multi-level eaves; commonly extensive porches.

Stick (1860-1890): The Stick style was a late 19th-century American architectural style. Many consider it a transitional style between the Carpenter Gothic style of the mid-19th century and the Queen Anne style that it had evolved into by the 1890s. It is named after using linear “stickwork” (overlay board strips) on the outside walls, which mimic an exposed half-timbered frame.

Identifying features: one or more front-facing gables on the steeply pitched roof; gables commonly show decorative trusses at apex; overhanging eaves, usually with exposed rafter ends; wooden wall cladding interrupted by patterns of horizontal, vertical, or diagonal boards (stickwork) raised from the wall surface for emphasis; porches commonly show diagonal or curved braces.

Craftsman (1905-1930): Craftsman homes emerged in the U.S. primarily between 1900 and 1929. The British Arts and Crafts movement inspired the American Craftsman style. Particularly popular in California and the Midwest, Craftsman architecture spread across the country in part thanks to American furniture designer Gustav Stickley, an Arts and Crafts movement booster who helped popularize the style (and coin the name) with his early 20th-century monthly magazine “The Craftsman.”

Identifying features: Low-pitched, gabled roof with wide, unenclosed eave overhang; roof rafters usually exposed; decorative beams or braces commonly added under gables; porches, either full or partial width, with the roof supported by tapered square columns or piers frequently extend to ground level; commonly one or one- and one-half stories high, although two-story examples occur in every subtype.

American Foursquare (1890-1930): The American Foursquare style was popular at the end of the 19th century and the first decades of the 20th century—from approximately the mid-1890s through the 1930s. It was influenced by the earlier Queen Anne and the Classical Revival style and shared similarities with the contemporaneous Prairie School and Craftsman bungalows. Foursquare homes were usually purchased through the Sears mail-order catalog. Between 1908 and 1940, Sears Roebuck sold 75,000 prefabricated Foursquare houses in 370 designs, which made it a popular home style in America.

Identifying features: Box or square shape, two to two and a half stories, low-pitched hip roof, a center dormer, covered front porch, large group together windows,

Contributing – “C” refers to buildings dating from the period of the district’s significance which have some architectural and/or historical importance, or which visually contribute to the cohesiveness of the district’s streetscapes.

Non-Contributing – “NC” shall mean a building, site, structure, or object that does not add to the historic architectural qualities, historic associations, or archaeological values for which a property is significant. A building can be non-contributing, if it was not present during the period of significance, or if it was altered, disturbed, or modified in a manner that eliminates its character defining features.
